

case study

Cheshire Police Headquarters

*Winsford,
Cheshire*

Charles Evans recently finished working on the £33m new purpose-built development of the Cheshire Police Headquarters and Training Centre in Winsford, Cheshire.

The Main Contractor on the project was HBG Construction Ltd who chose Charles Evans, a preferred HBG sub-contractor, to work with them. HBG were particularly impressed with Charles Evans' input in the early stages of the project, where they were able to provide both cost and time savings by suggesting alternative materials and suppliers.

Charles Evans worked specifically on the joinery fit out including the supply and fitting of over 600 doors, plus over 7km of skirting board, as well as cill boards and other sundry joinery work. The project was delivered on-time and on budget.

CUSTOMER FEEDBACK:

"Charles Evans have a good team of workers and worked very proactively on-site to keep the job on track. I was very happy with their finished work".

Stuart Prosser, Project Manager for HBG
