

## case study

### **Leo Casino**

*Queens Dock  
Liverpool*

Charles Evans were proud to work on the £6 million 2-storey Leo Casino at Queens Dock, Liverpool. Built in 2002, the 18,000 square foot casino boasts a 60-seater restaurant and spectacular views over the River Mersey.

As it was owner Amaury Taittinger's first casino, he was keen to ensure that the time and money was spent to ensure it was just right. He wanted to make sure that the architecturally designed building was equipped to the highest standard and that only the best contractors were used.

Charles Evans provided a range of services including tiling, flooring, decoration, partition work, joinery and ironmongery. The end result is a stunning interior for the impressive glass rotunda-fronted casino.

#### **CUSTOMER FEEDBACK:**

"I was delighted with the work that Charles Evans did on the casino. They were reliable, hard working and I was pleased with the quality of their work".

**Mr Amaury Taittinger, Owner.**

"The Charles Evans site team were excellent, without exception! Their workmanship was first class and I was extremely impressed by their traditional approach to quality and the knowledge of those involved at all stages".

**Charles Pollard, Project Manager.**
